App Flow with Screen Shots

When app is launched user has to accept the Terms & Conditions to set up the application.

****Data in the Screenshot is blurred due to Privacy concerns****

As soon as the user accepts Terms & Conditions, app is directed to Quick Guide mode as seen in the Screen shots below.

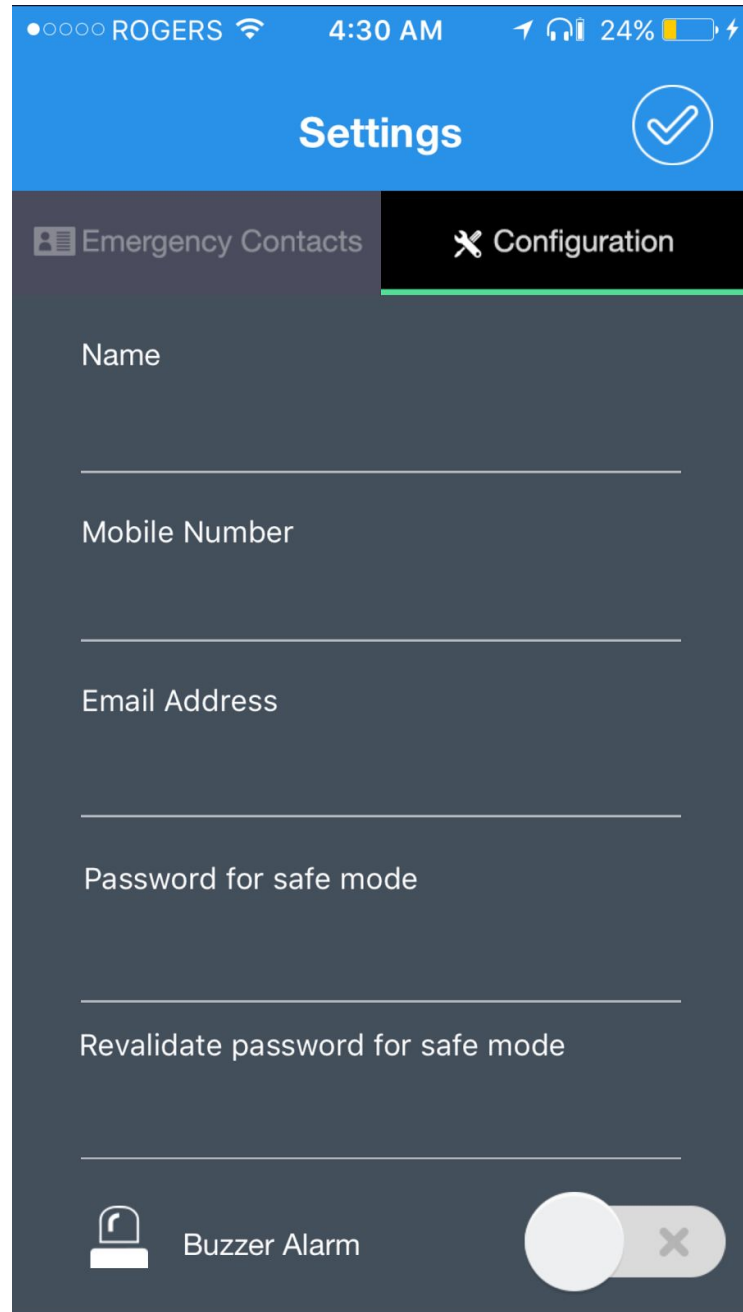

After reviewing the application Quick Guide, user is directed to Settings page of the application where user has to complete 2 steps for Setup.

Emergency Contacts

The screenshots show the 'Emergency Contacts' settings page in an application. The page has a blue header with 'Settings' and a checkmark icon. Below the header, there are two tabs: 'Emergency Contacts' (selected) and 'Configuration'. The main content area is dark grey and contains a list of contact methods: 'SMS', 'Email', and 'Call'. Each method has a corresponding icon and a right-pointing arrow. Below the list, there is a text prompt: 'Please type contact number/name saved in phone to get auto suggestions.' The top row of screenshots shows the 'SMS' method selected, with three empty 'Phone number' input fields. The bottom row of screenshots shows the 'Email' method selected, with three empty 'Email' input fields. The 'Call' method is also visible at the bottom of the list.

Configuration

The screenshot shows a mobile application interface with a status bar at the top displaying signal strength, carrier name (ROGERS), time (4:30 AM), and battery level (24%). The app's main header is blue with the title "Settings" and a checkmark icon. Below the header, there are two tabs: "Emergency Contacts" and "Configuration", with the latter being selected and highlighted in black. The "Configuration" screen has a dark grey background and contains several input fields and a toggle switch. The input fields are labeled "Name", "Mobile Number", "Email Address", "Password for safe mode", and "Revalidate password for safe mode". The "Buzzer Alarm" toggle switch is located at the bottom right and is currently turned off, indicated by a grey circle and an 'X' icon.

Settings

Emergency Contacts Configuration

Name

Mobile Number

Email Address

Password for safe mode

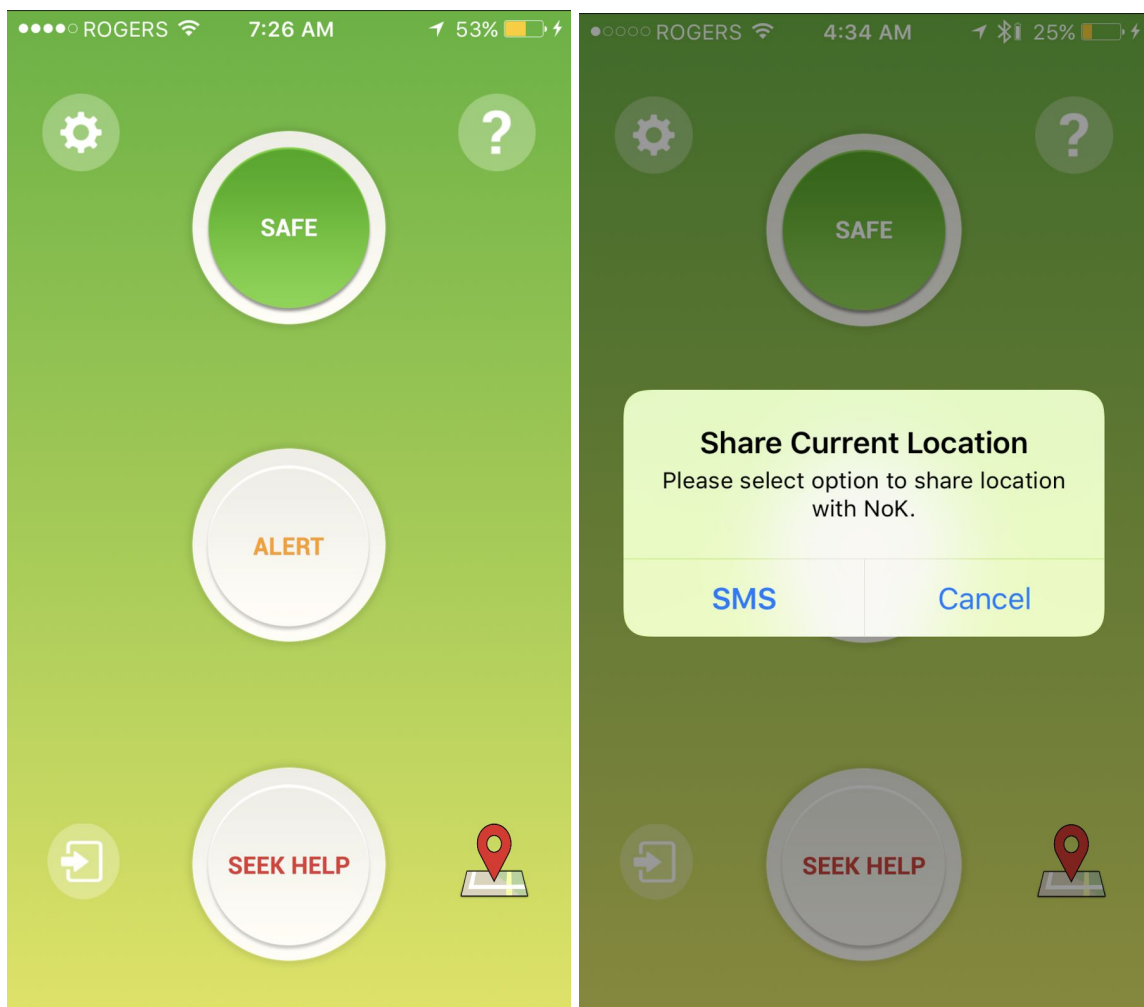

Revalidate password for safe mode

Buzzer Alarm

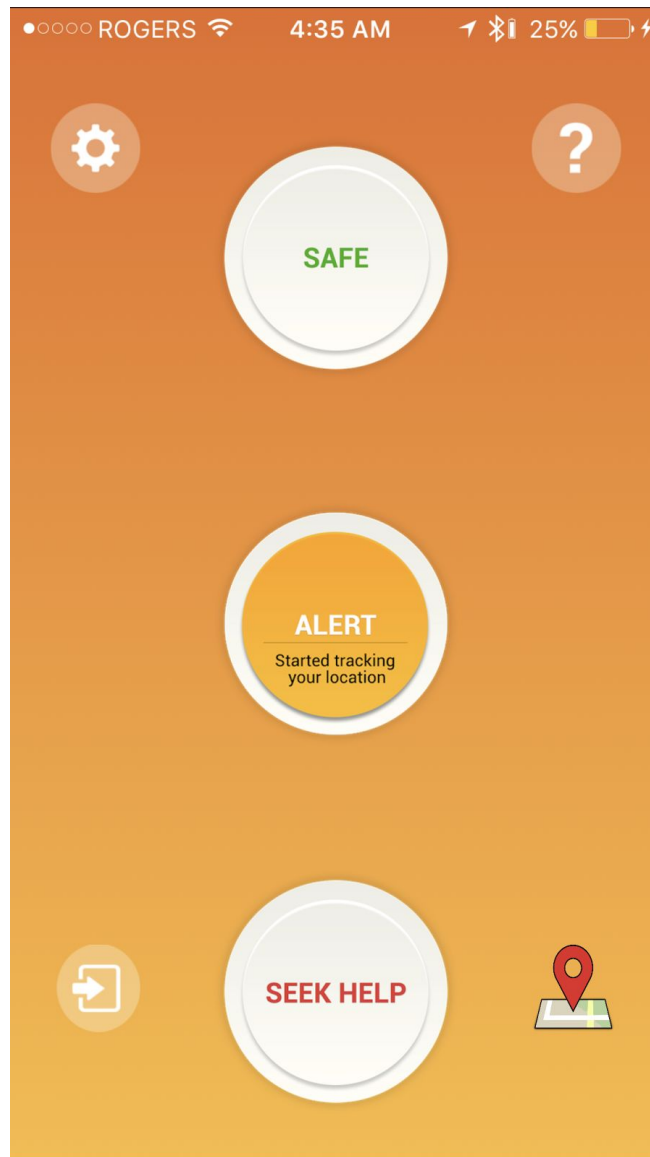

Once the setup is done user is directed to home page of the application.

Home Screen

Safe Mode

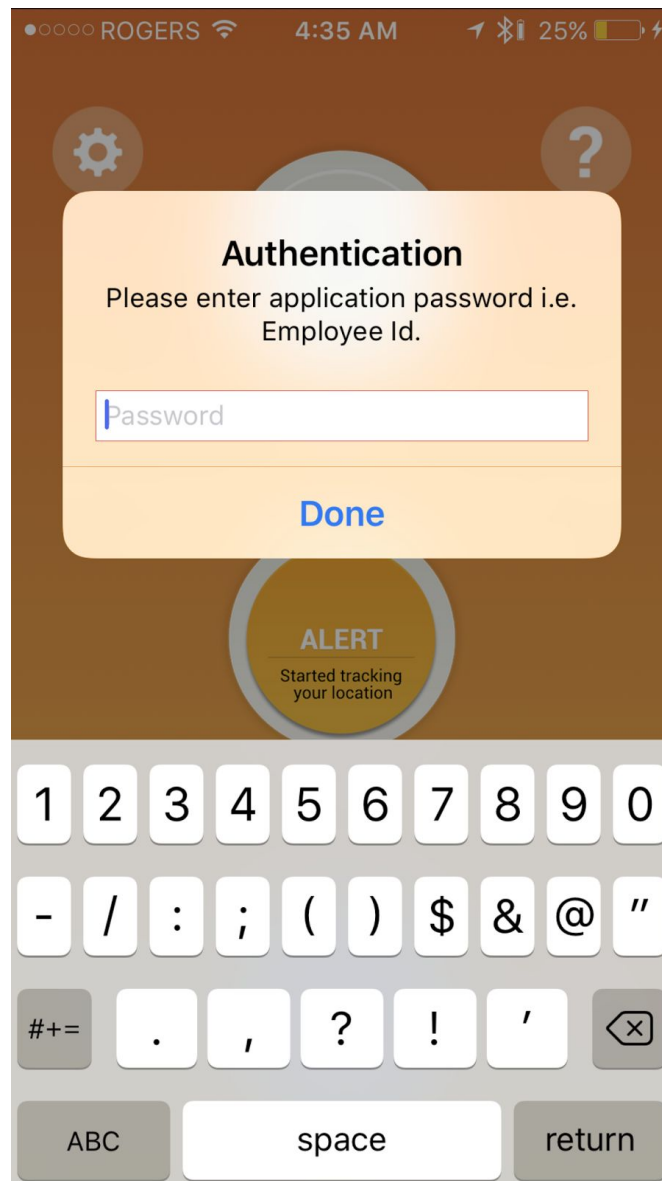

Alert mode

When the user turns on Alert mode, application immediately starts tracking the location. The location of the user is sent to emergency contacts via email and sms.

If the user want to return to safe mode from Alert mode, there is authentication process where user has to enter the password which has been set at the configuration process.

Seek help mode

As soon as the user clicks on Seek Help, a countdown timer of 5 seconds start and if there is no response from user till it goes to zero , Alarm starts ringing and the location of the user is sent to emergency contacts via email, sms and an automated call is made.
